

Bowmans - Strike management guidelines:

Is your business struggling to manage industrial action? For many employers, strikes can be a significant source of stress and anxiety. It is important to be able to act swiftly and effectively in dealing with trade unions and employees when a deadlock is reached during collective bargaining.

Bowmans' *Strike Management Guidelines* provide practical guidance to employers who are facing industrial action, whether protected or unprotected. Materials include step-by-step guidelines for handling protected and unprotected strikes, guidance notes on the applicable legal principles, sample picketing rules and pro forma documents that can be tailored and issued to relevant stakeholders including customers, clients, suppliers and neighbouring businesses, trade unions and striking employees.

Clients have the option of purchasing the toolkit with or without an accompanying two-hour training session on managing industrial action in the workplace. For more information, or to purchase the toolkit, send an email to StrikeToolkit@bowmanslaw.com.
